C: 778 990 2743

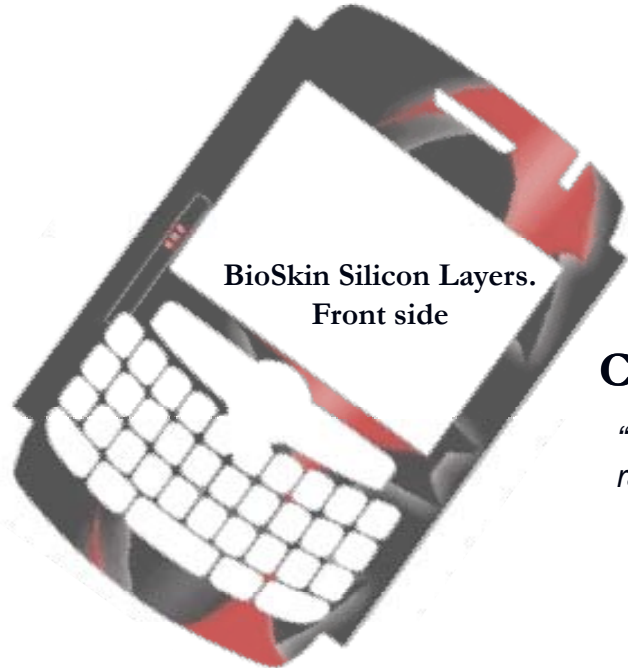

Provisional Patent : 61/139,594

# BioSkin EMA<sup>®</sup> Shield

- ✓ BioSkin EMA<sup>®</sup> is the world first **Electromagnetic Radio Frequency Absorbing Shield**.
- ✓ It is designed specifically for Smartphone's.
- ✓ BioSkin EMA<sup>®</sup> shielding case absorbs electromagnetic incident radiation while **boosting** your Smartphone capabilities.

# The BioSkin Design

Fits your smartphone like a glove...

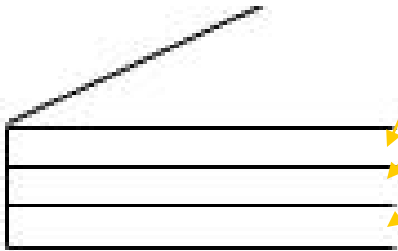

BioSkin Silicon Layers.  
Front side

## Custom Composite Electromagnetic Shielded Material

*"It lets CDMA, GPS signals In & Keeps incidental radiation from getting out!"*

## Special Electromagnetic Shielded Material

Outer Layer — Silicon Layer  
Embedded - LED board layer  
EMA — Protected layer

BioSkin Silicon Layers.  
Backside

It also provides cell phones users with a sure grip, protecting the display, keyboard, and all corners and sides of your Smartphone against bumps, scratches and is water resistant.

# THE PROBLEM

## Interesting Fact:

When the cell phone signal is held next to the brain there are changes in the brainwaves in 70% of people.

## Research:

The National Cancer Institute in the U.S. did a study of people in industries that exposed their workers to microwaves.

They found that in seven industries in the Eastern U.S. there has been a tenfold increase in brain tumors among employees who have worked there for twenty years.

The main cause appears to be electromagnetic radiation.

# THE SOLUTION.

**Protection:** Silicon based composite resin.

- Absorbs incidental electromagnetic radiation
- Protects host iPhone/BlackBerry if dropped or bumped
- Open/Close slots for all access ports: water resistant

**Connectivity:** New\* Bluetooth Social Networking Tools.

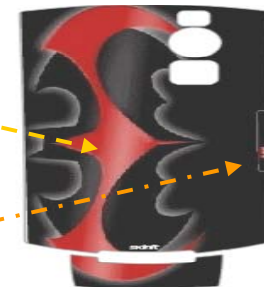

- E.Card Exchange
- Integrated GPS Map: Step-by-Step “on-foot-directions”
- Optional G3 Antenna: For non-G3 phones providing channeled connectivity

**Life Style Choice:** LED Display: RED, Green, Blue.

- Custom Designs: Logo's in LED Board
- Movies Clips Ringtone
- Dazzling Lightshow

**Security:** Optional Biometric Scanner

- For maximum security of device we can offer a in-skin fingerprint scanner

# BioSkin EMA<sup>©</sup> L.E.D.

The BioSkin EMA<sup>©</sup> Silicon jacket can be design entirely by the end users online and ordered, with their own custom images, licences logo and shaped L.E.D boards.

- It offers lightshow on the back of phone, on Batman logo, Butterfly's with dazzling colors.

BioSkin EMA<sup>©</sup> shield is a skin covering that protects end user from all of their gadgets invisible radiation that may case brain cancer.

BioSkin EMA<sup>©</sup> embedded board features a MCU, SRAM that support new social network mobile applications.

# New Social Networking

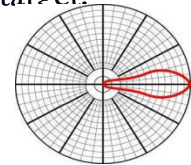

## BioSkin EMA Plug-n-play Apps

### Facebook Bluetooth:

Allows end users to passively connect with people in a tradeshow, club, restaurant or even the park while at work or at play. The BioSkin EMA upgrades Facebook application with Bluetooth connectivity allowing end user to passively, digitally network with passers by based on cross networking algorithm of an “**open book profile**” network setting.

### Linkedin Bluetooth:

Linkedin Bluetooth, allows business networking to take place on a whole new level. Corporate end users can passively or actively connect to other professionals in tradeshows, conventions, or even on the street. It also directs end users via integrated GPS mapping and in building directional (arrowed) pointing to target.

### Other Bluetooth Network:

MySpace -- Flickr -- Bebo -- Nexopia -- Classmates.com -- FriendFinder --MSN Messenger

### Bluetooth E.Card Exchange:

Exchange contact information by tapping Smartphone's together
